Scotty Cameron Fine Milled Putters

Scotty Cameron by Titleist putters are the leading choice of the world's finest players. For nearly a decade, Scotty Cameron putters have led the PGA Tour in usage and victories. When crucial putts are on the line, more competitive players at every level roll it with Scotty.

This trust is born from the extensive product and player research Scotty conducts at his state-of-the-art Putter Studio in California. Scotty's hands-on approach to product design, as well as the forward-thinking incorporation of modern research and testing, make Scotty the game's most respected expert in putting.

Nothing inspires pure putting confidence like a fine milled, Scotty Cameron putter.

A Game Within a Game

"What takes place on the putting green is different. The art of putting requires a deft sense of feel, speed control, solid mechanics, and an unwavering nerve.

I work with the world's best players who are separated by only a stroke or two over the course of a Championship. Their methods are different. But their goal is always the same. To get the ball into the hole the fastest way possible.

It is my sole focus to understand their needs and develop putters that provide unmatched performance at the highest levels of competitive golf. Everything I learn from working with Tour players, I incorporate into my putters – so that all players, at all levels of competitive golf can benefit.

I am a putter maker. It is who I am. It is what I do."

Scotty Cameron

Newport®

A soft, flowing body with a square, plumbing neck hosel and single sightline.

Newport Mid available RH/LH

Newport 1.5

A soft, flowing body with a short, round flare neck and single sightline.

Newport 2

A crisp, boxy body with a square, plumbing neck hosel and single sightline.

Newport 2.5

A crisp, boxy body with a short, round flare neck and single sightline.

Studio Style

By combining the finest milled stainless materials with precision face inlay technology, Studio Style putters provide superb feel and sound for a soft, responsive touch. Studio Style putters, with their classic body style, are a favorite among Touring Professionals worldwide.

GERMAN STAINLESS STEEL FACE INLAY supported by a vibration absorbing pad and an elastomer cushion provides an outstanding, crisp feel.

PRECISION MILLED BODY from a one-piece block of 303 Studio Stainless Steel.

DRAFT SOLE DESIGN keeps the putter square in the playing position for proper alignment.

No. 1

A wide, round flange without a pocket, round neck.

No. 2

A wide, square flange with a pocket and step, round neck.

No. 3

A wide, square flange with a pocket and step, plumbing neck.

No. 5

A mini-mallet with a dropped, concave sole, single-bend shaft.

CIRCA 62

Circa 62 putters represent and embody the best of a classic putter generation. Precision milled from soft carbon steel and finished in black oxide, Circa 62 offers a soft, responsive feel and classic lines.

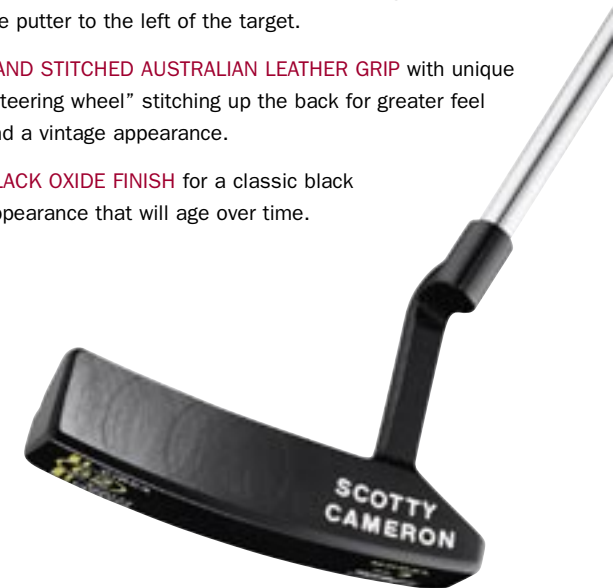

MILLED FROM SOFT CARBON STEEL for a soft sound and feel which allows precise distance control.

DRAFT SOLE DESIGN keeps the putter square in the playing position for proper alignment.

HIGH-TOE PROFILE aids alignment and eliminates the tendency to raise the toe at address causing a player to aim the putter to the left of the target.

HAND STITCHED AUSTRALIAN LEATHER GRIP with unique “steering wheel” stitching up the back for greater feel and a vintage appearance.

BLACK OXIDE FINISH for a classic black appearance that will age over time.

R E D X™

Red X

A compact mallet with a clean profile and flowing, single-bend shaft.

Red X Mid available RH/LH

Red X2

A compact mallet with a clean profile and near-center shaft configuration.

Red X2 Mid available RH
Red X2 Long available RH/LH

Red X

Red X mallets feature clean, refined head shapes with sophisticated performance features for proper toe-flow, superior feel and roll. Red X is sought after by Touring Professionals who prefer a traditional mallet shape with bold sightlines for consistent, proper alignment.

GERMAN STAINLESS STEEL FACE INLAY supported by a vibration absorbing pad and an elastomer cushion provides an outstanding, crisp feel.

PRECISION MILLED BODY from a one-piece block of 303 Studio Stainless Steel.

ANODIZED ALUMINUM SOLE PLATE with negative bounce ensures the putter sits square at address for proper alignment and creates the proper CG location for a true roll.

HIGH-TOE PROFILE aids alignment and eliminates the tendency to raise the toe at address causing a player to aim the putter to the left of the target.

F U T U R A P H A N T O M™

Futura Phantom

A contemporary mallet with a forward shaft bend and no-offset.

DEEP SHAFT MOUNT near the CG helps produce a flowing backstroke and the proper path.

LARGE T-SHAPED FRAME with extended sole rudders for better stability. Single silver sightline for easy alignment.

DEEP SEMI-CIRCULAR STEEL BACKWEIGHT creates a deep CG and high moment of inertia for forgiveness and stability through the stroke.

Futura Phantom Mallet

A semi-circular, high-tech mallet with a flowing, single bend shaft.

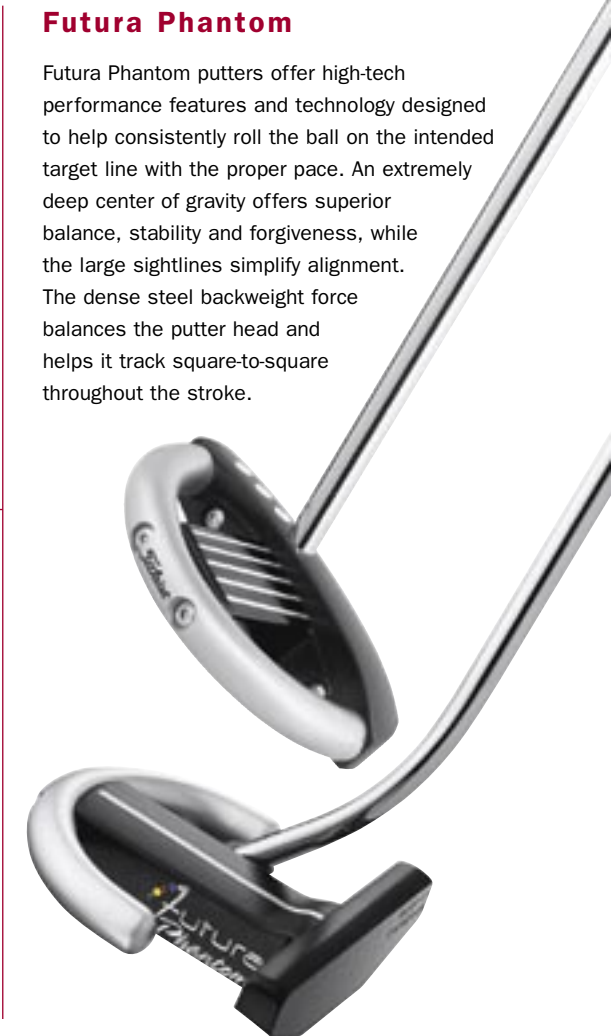

Futura Phantom Mallet 2

A semi-circular, high-tech mallet with a near-center shaft configuration.

Futura Phantom

Futura Phantom putters offer high-tech performance features and technology designed to help consistently roll the ball on the intended target line with the proper pace. An extremely deep center of gravity offers superior balance, stability and forgiveness, while the large sightlines simplify alignment. The dense steel backweight force balances the putter head and helps it track square-to-square throughout the stroke.

AMERICAN CLASSIC III™

Blade

A Bulls Eye style blade with a smooth topline.

Flange

A Bulls Eye style blade with a back flange featuring a perpendicular sightline.

Heavy Flange

A shorter, heavy flange putter with a perpendicular sightline.

American Classic III

American Classic III putters have strong ties to the original brass Bulls Eye® developed by John Reuter. American Classic III updates the Bulls Eye putter designs with contemporary styling and performance features.

PRECISION MILLED from 303 Studio Stainless Steel for the classic feel synonymous with Bulls Eye putters.

COPPER-TUNGSTEN WEIGHTING in the heel and toe offers a higher moment of inertia for less putter face twisting during off-center impacts.

LONGER BLADE LENGTHS than the original generation of Bulls Eye putters for easier alignment.
